WORK EXPERIENCE

Software Development Engineer I
Sep 2026 – Current

TerraByte Technologies Private Limited (PlotPix) — Bengaluru

- Built **PlotPix's first end-to-end observability system** using **Sentry, Flutter, Node.js, SQLite, and NAS**, with P0/P1 error tracking and an internal dashboard, **accelerating bug resolution by 10% –> 60%**.
- Automated **nightly 2 AM IST web health checks** using **Playwright and TypeScript** for playback, paywalls, chat, and subtitles, integrating failures into centralized monitoring for **early bug detection**.
- Developed **Story Vault**, enabling Booster subscribers to **permanently unlock 1 story/month**, increasing **subscriber retention from 10% –> 35%**.

Software Development Engineer I
Nov 2025 – Apr 2026

SuperAGI (formerly Contlo) — Bengaluru

- Owned **WhatsApp and email campaign workflows** end-to-end across UI, APIs, testing, release validation, and production support using **React.js, TypeScript, Redux, REST APIs, MSG91, and Mailgun**.
- Built campaign analytics and monitoring workflows covering **delivery status, recipient failures, retries, filtering, and performance visibility**.
- Coordinated a **6-member engineering and QA team** across planning, debugging, testing, and release validation.
- Reduced DOM rendering overhead by **60%** and unnecessary re-renders by **30%** using **virtualization, lazy loading, code splitting, and debounced API interactions**.

Product Engineer
Jun 2024 – Nov 2025

MBB Labs Private Limited (Maybank) — Bengaluru

- Delivered business-critical **commercial loan application workflows** using **React.js, JavaScript, Redux**, responsive UI development, and backend API integration.
- Resolved **200+ production UI issues**, improving application stability, cross-browser compatibility, and user experience.
- Contributed to **3,000+ automated tests** using **JUnit, Mockito, Jest, and JaCoCo**, helping maintain **85%+ test coverage**.
- Analyzed UI flows, API payloads, data mappings, and business rules while supporting deployment validation and production releases.

Junior Software Developer
Sep 2023 – Jan 2024

Opethic Software Solutions LLP — Solapur

- Owned authentication and access-control workflows across **React.js, Node.js, Express.js, and MongoDB**.
- Built **JWT-secured authentication, protected routes, REST API flows, validation, state handling, and error scenarios**, improving onboarding efficiency by **20%**.
- Reduced unnecessary API requests by **30%** through debounced search and filtering across data-driven screens.
- Improved UI responsiveness by **10%** with Redux and backend-driven updates, increasing workflow visibility and user engagement by **25%**.

PROJECTS

Three-Way Match Engine
Live | Repo

AI-Powered Procurement Reconciliation Platform

- Built a **Next.js, Node.js, Express.js, MongoDB** platform automating **PO, GRN, and Invoice reconciliation**, with REST APIs, layered architecture, Swagger, authentication, automated tests, and Vercel deployment.
- Integrated **Gemini AI** with schema validation, SKU resolution, price/quantity matching, and immutable audit history.

TraceGraph
Live | Repo

Software Incident & Dependency Intelligence

- Built a **Next.js, TypeScript, CognoDB, openCypher** platform with layered APIs, parameterized Cypher queries, and interactive software-dependency topology.
- Modeled graph relationships supporting **multi-hop traversal, shortest paths, blast-radius analysis, and Expert Finder**, with production deployment on **Vercel**.

PROFILE SUMMARY

Full Stack Software Engineer with **2.5+ years of experience** building scalable web applications, AI-powered solutions, and robust backend systems. Skilled in **React.js, Next.js, TypeScript, Node.js, Express.js, MongoDB, PostgreSQL, and REST APIs**, with expertise in **AI integration using Gemini API, microservices, system design, and performance optimization**. Experienced in delivering **AI-driven applications, enterprise fintech platforms, and production observability systems**, with hands-on experience in **automated testing, CI/CD, and cloud deployment**.

TECHNICAL SKILLS

Frontend
React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, HTML5, CSS3, Tailwind CSS, Ant Design

Backend & APIs
Node.js, Express.js, Golang (Go), Gin Framework, REST APIs, GraphQL, gRPC, tRPC, WebSockets, Socket.IO, OAuth 2.0, JWT, Zod, Swagger

Generative AI & LLM Engineering
LLMs, Prompt Engineering, LangChain, LangGraph, RAG, AI Agents, Multi-Agent Systems, Tool Calling, Embeddings, Vector Databases, Graph RAG, MCP, LangSmith

Databases & Caching
MongoDB, PostgreSQL, Redis, SQL, Prisma ORM, Mongoose ODM

Architecture & Engineering
Microservices, System Design, Event-Driven Architecture, Kafka, RabbitMQ, CQRS, Saga Pattern, Event Sourcing, Transactional Outbox, CDC, Distributed Locks, Caching, Rate Limiting, RBAC

Testing & Quality
Jest, Playwright, JUnit, Mockito, JaCoCo, SonarQube, Supertest, k6

DevOps & Cloud
Git, GitHub Actions, Docker, Kubernetes, AWS, GCP, Vercel, Sentry, Prometheus, Grafana, PM2, CI/CD

EDUCATION

Bachelor of Technology

Dr. Babasaheb Ambedkar Technological University

2018 – 2021 — Lonere

Civil Engineering — **GPA: 8.88**
